

Mini MST

Standard MST

Multiport Service Terminals (MSTs)

TE Connectivity's (TE) FTTX infrastructure solutions are designed from the ground up to meet the unique requirements of FTTX networks. Designed for operational efficiency and scalability, TE's FTTX solutions simplify network installation, maintenance and management from the central office/head end to the outside plant.

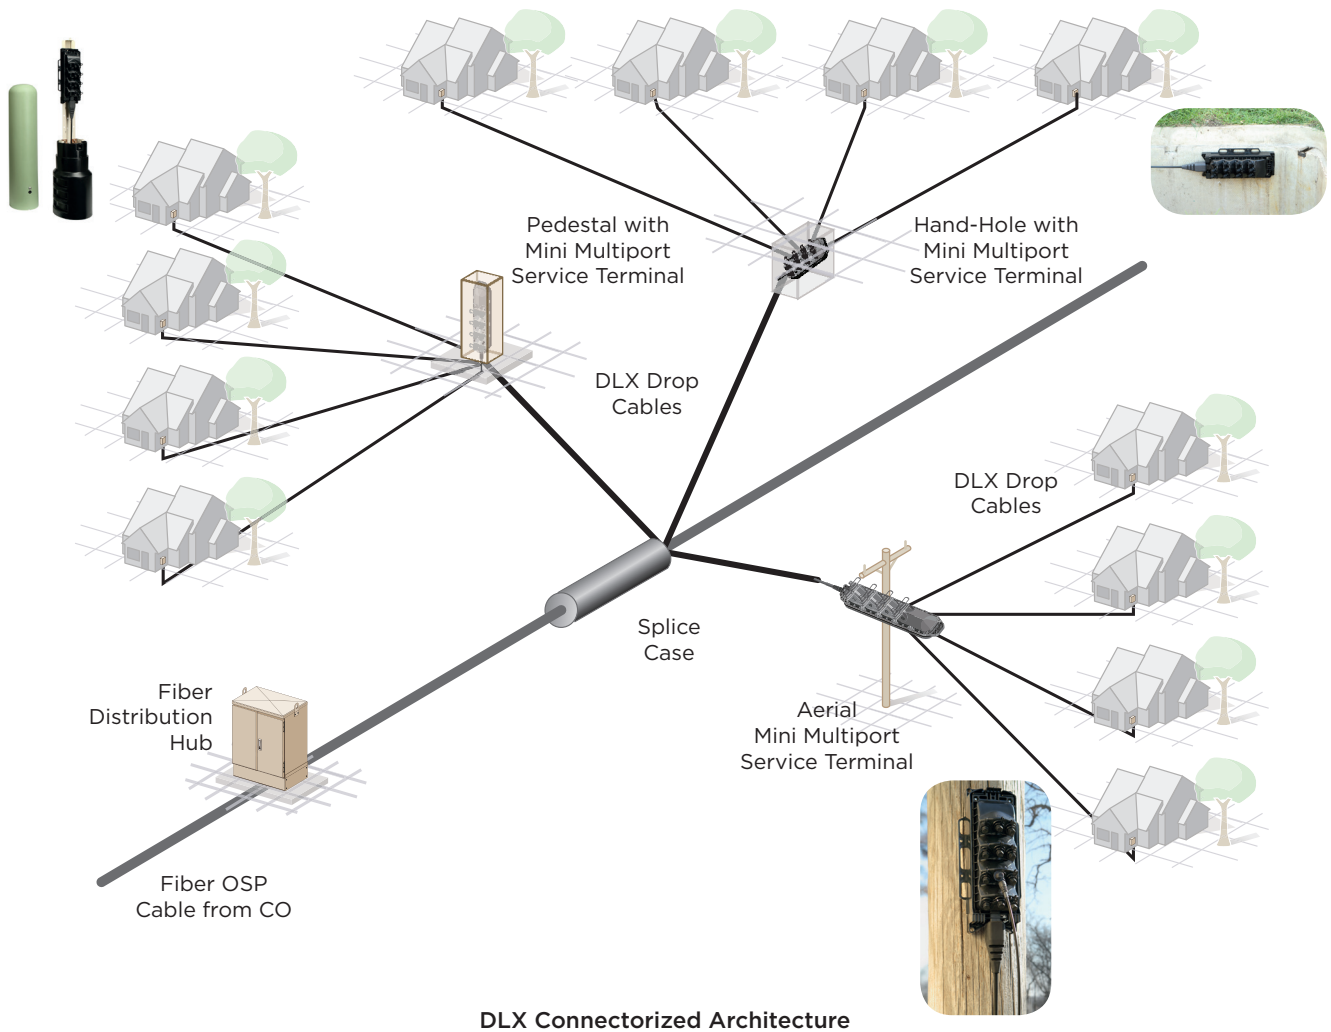

The Multiport Service Terminal (MST) incorporates hardened connector technology that is designed to withstand the rugged outside plant environment. These uniquely designed hardened connectors are factory-terminated and environmentally sealed for use in optical drop cable deployments.

FEATURES AND BENEFITS

- Stubbed, hardened terminals in two sizes:
 - Full-sized (OptiTap® compatible) hardened connectors
 - Miniaturized (DLX) hardened connectors
- Delivered factory-sealed
- Supplied with a length of feeder cable
- From 2 to 12 hardened ports for single or multifiber connectors
- Can be supplied with hardened multifiber connector at the feeder cable
- Available with pre-mounted and tested optical splitter
- IP68 and 2m waterhead
- Aerial and manhole installation
- Angled adapters for increased hand access
- Universal mounting bracket
- Robust environmental performance: Withstands extremes in temperature and conditions
- Technician-friendly features: Intuitive design for ease of use
- Decreased installation and maintenance hours: Significant savings
- Protection: Self-contained unit features hardened connectors for superior durability and reliability in the drop segment of the network
- Compatibility: Interoperability with industry standard hardened connectors
